■ Marketing Coordinator Role → Website Coverage Analysis

Source: Marketing & Community Outreach Coordinator role description (ICC of Texas)

Compared against: Marketing Planner web app, as of 2026-05-14

Legend:

- ■ **Covered** — feature exists in the app
 - ■ **Partial** — partially covered; admin handles some of it manually
 - ■ **Not covered** — out of scope, would need a new feature OR happens elsewhere (Outlook, social tools, etc.)
-

Executive summary

The marketing planner covers about **45-55%** of the coordinator role, focused mainly on:

- The **operational tracking** half (calendar, visits, referrals, lead status, spending)
- The **outreach scheduling** half (clinics, MVA firms, community orgs)
- The **performance metrics** half (rankings, monthly/quarterly reporting)

What it does **NOT** cover:

- **Content / Brand work** (social media, ads, newsletters, scripting, brand audits)
- **Materials & inventory** (print materials, promotional items, signage)
- **Patient-experience touchpoints** (satisfaction surveys, hospitality, concierge work)
- **External communications** (emails to vendors, agencies, partners)

These are areas the coordinator handles outside this tool — typically in Outlook, social platforms, design software, or paper/spreadsheets.

1. STRATEGY PLANNING & COORDINATION

Responsibility	App coverage	Notes
Coordinate weekly marketing meetings	■	Happens in Outlook / Teams
Maintain marketing activity calendar	■	The Dashboard tab IS this — full year, 6 slots/day
Track campaigns & community events	■	Events panel + Observances + Outreach orgs tracked
Align with digital marketing team	■	App doesn't have a digital-marketing module; coord is offline
Prepare weekly/monthly reports	■	Bulk CSV export works manually; Power Automate auto-export planned

Deliverables

Deliverable	App coverage
Marketing calendar	■ — Dashboard
Campaign tracking sheets	■ — visits track activity, but no "campaign" entity yet
Weekly activity updates	■ — Reports tab has progress views; weekly summary not auto-generated
KPI dashboard updates	■ — Home + Team Performance show stats; not auto-exported daily

2. COMMUNITY OUTREACH & EDUCATION

Responsibility	App coverage	Notes
Build relationships with faith-based groups, schools, HOAs & orgs	■	OUTREACH database (46 entries — mosques, temples, churches, schools, chambers, MAs)

Responsibility	App coverage	Notes
Schedule & coordinate health events	■	Calendar + Events + Holiday observances tied to outreach
Coordinate free screenings & educational workshops	■	Can be scheduled as a visit, but no "screening" event type with attendee tracking
Organize sponsorships & community participation	■	Not in app — handled externally

Deliverables

Deliverable	App coverage
Outreach schedules	■ — Random/Scheduled/Holiday categorized + on calendar
Community contact database	■ — OUTREACH list (46 organizations)
Event sign-up sheets	■ — not in app
Partnership tracking log	■ — lead status (L1-L4) tracks relationship depth

3. BRAND POSITIONING & AWARENESS

Responsibility	App coverage
Communicate facility differentiators	■
Ensure consistent messaging across all platforms	■
Train staff on key messaging	■
Distribute branded materials	■
Maintain facility marketing displays	■

Deliverables

Deliverable	App coverage
Staff scripting guides	■
Brand consistency audits	■
Collateral inventory	■
Promotional material coordination	■

Section coverage: 0% — entire area is outside the app's scope. This is content / brand / training work that lives in Word docs, designed materials, training sessions.

4. MARKETING EXECUTION (ONLINE & OFFLINE)

Digital Marketing Coordination

Responsibility	App coverage
Coordinate social media & content	■
Work with digital marketing agency	■
Email newsletters, reviews, ads	■
Monitor online engagement	■

Offline Marketing Coordination

Responsibility	App coverage
Coordinate print materials, flyers	■
Manage promotional items & inventory	■
Local print ads & community materials	■

Deliverables

Deliverable	App coverage
Social media calendar	■
Newsletter drafts	■
Promotional inventory logs	■
Monthly performance summaries	■ — monthly Excel export planned

Section coverage: ~5% — almost entirely outside the app's scope. This is digital/print marketing execution work handled by the digital team, agencies, design tools.

5. PATIENT ENGAGEMENT & PROMOTIONS

Responsibility	App coverage
Coordinate monthly ER events	■ — Events panel exists
Manage review incentive programs	■
Organize patient appreciation campaigns	■
Develop loyalty & engagement initiatives	■
Coordinate follow-up communications	■

Deliverables

Deliverable	App coverage
Event plans & checklists	■
Engagement reports	■
Review tracking logs	■
Promotional campaign summaries	■

Section coverage: ~10% — events are partially tracked. The other items (loyalty, reviews, campaigns) are outside this tool.

6. REFERRAL NETWORK DEVELOPMENT ■ STRONGEST AREA

Responsibility	App coverage	Notes
Build relationships with PCPs, urgent cares, specialists & more	■	CLINIC_BANK (595 clinics) + MVA_ATTORNEYS (20 firms) — full database
Schedule clinic visits & presentations	■	The core of the app — entire calendar workflow
Deliver referral materials & education	■	Materials themselves aren't tracked, but the VISIT that delivers them is
Maintain referral databases	■	CLINIC_BANK + BUSINESS_REFERRALS with per-business counts + history
Track inbound & outbound referrals	■	BUSINESS_REFERRALS (referrals received), visit logs (outbound outreach)

Deliverables

Deliverable	App coverage
Referral tracking reports	■ — Rankings tab + monthly CSV exports
Clinic visit logs	■ — entire calendar + member history
Referral partner database	■ — CLINIC_BANK + MVA_ATTORNEYS
Outreach follow-up documentation	■ — Lead status (L1-L4) + visit notes + next-visit notes

Section coverage: ~95% — this is what the app was built for. The strongest match.

7. PATIENT EXPERIENCE SUPPORT

Responsibility	App coverage
Support concierge patient experience initiatives	■
Assist patient care coordinators	■
Monitor patient satisfaction feedback	■
Coordinate hospitality touchpoints	■
Ensure marketing promises align with patient experience	■

Deliverables

Deliverable	App coverage
Patient satisfaction summaries	■
Improvement recommendations	■
Follow-up coordination logs	■

Section coverage: 0% — entirely patient-facing work that happens at the clinic + via separate patient satisfaction tools (CRM, surveys, etc.). Not where this app lives.

8. MARKETING ANALYTICS & OPTIMIZATION

Responsibility	App coverage	Notes
Track & report key marketing metrics	■	Member stats + Rankings + Finances — partial picture
Monitor campaign performance	■	No campaign entity, but visit outcomes tracked
Analyze community engagement	■	Outreach activity tracked via visits + leads
Measure ROI of marketing activities	■	Spending data + Rankings = rough ROI signal , no formal ROI computation
Recommend strategy improvements	■	Human analysis only

Deliverables

Deliverable	App coverage
Monthly KPI reports	■ — manual export today, auto-export coming
Marketing ROI analysis	■ — Finances tab has the raw data
Referral growth reports	■ — Rankings tab
Strategy improvement recommendations	■

Section coverage: ~40% — raw data is here, but human analysis + recommendations happen offline.

Operational Timeframe Coverage

DAILY

Task	App coverage
Answer outreach emails/calls	■ — Outlook / phone
Schedule meetings & events	■ — Dashboard calendar
Coordinate vendor communication	■
Maintain marketing CRM & contact databases	■ — Bank of Targets
Update marketing spreadsheets	■ — the app replaces spreadsheets entirely
Order supplies & materials	■

Task	App coverage
Facility branding walkthroughs	■

WEEKLY

Task	App coverage
Marketing team meeting	■
Referral outreach follow-up	■ — leads + visits
Social media coordination	■
Community engagement planning	■ — outreach scheduling
Marketing analytics review	■ — Rankings + member stats
Event coordination	■ — Events panel

MONTHLY

Task	App coverage
Community event execution	■ — calendar + Outreach
Referral partner visits	■ — core function
Marketing ROI reporting	■ — partial via Reports/exports
Promotional campaign review	■
Patient engagement initiatives	■ — via visits
Leadership marketing presentation	■ — Reports tab gives the data

KPIs Coverage

Community Growth

KPI	App coverage
# of outreach events	■ — calendar shows all
Community partnerships	■ — OUTREACH database
Event attendance	■ — not tracked per event

Referral Growth ■

KPI	App coverage
New referral partners	■ — CLINIC_BANK additions tracked
Referral volume growth	■ — BUSINESS_REFERRALS counts + history
Clinic engagement frequency	■ — visit frequency per clinic

Patient Engagement

KPI	App coverage
Google review growth	■
Social media engagement	■
Patient participation rates	■

Marketing Performance

KPI	App coverage
Campaign ROI	■ — spending tracked, not formal campaign ROI
Website/social traffic	■
Lead conversion metrics	■ — leads tracked (L1-L4); patient conversion is downstream

Overall coverage by section

Section	Coverage
6. Referral Network Development	■ ~95%
2. Community Outreach & Education	■ ~70%
1. Strategy Planning & Coordination	■ ~55%
8. Marketing Analytics & Optimization	■ ~40%
5. Patient Engagement & Promotions	■ ~10%
4. Marketing Execution	■ ~5%
3. Brand Positioning & Awareness	■ 0%
7. Patient Experience Support	■ 0%
OVERALL	~47%

■ What the app does best

1. **Referral network management** — clinics, MVA firms, outreach orgs all in one place, with tier-based rankings
2. **Visit calendar + scheduling** — the daily operational workflow
3. **Lead tracking** — relationship depth (L1-L4) per business
4. **Activity logging** — every visit, completion, spending entry
5. **Team coordination** — live sync so everyone sees the same data

■ What the app deliberately doesn't do

The app is a **marketing OPERATIONS tool**, not a marketing **CONTENT** or **BRAND** tool. Items NOT in scope:

- ■ Social media content creation / scheduling (use Hootsuite / Sprout / etc.)
- ■ Email newsletter / campaign management (use Mailchimp / Constant Contact / etc.)
- ■ Patient satisfaction surveys (use Press Ganey / CG-CAHPS / etc.)
- ■ Brand asset / style-guide management (use SharePoint or Word docs)
- ■ Promotional inventory tracking (use Excel or a dedicated inventory app)
- ■ Print material design / production (use Canva / Adobe / etc.)

Adding any of these would expand the app significantly. Each is a 1-2 week feature on its own.

■ What we COULD add (prioritized)

If you want to expand the app's coverage of this role, here are the highest-impact additions:

High value, small effort (1-3 hours each)

1. **Campaign entity** — wrap multiple visits under a named campaign (e.g., "Q1 Frisco Push"). Auto-rolls up ROI from spending + new leads.
2. **Materials inventory** — simple list of promotional items + counts. Decrement when used on a visit.
3. **Event attendance tracking** — add an "attendees" field to each outreach event row.
4. **Vendor / agency log** — small panel for tracking digital agency, print vendors, with contact info + last touchpoint.

Medium effort (3-8 hours each)

5. **Google reviews integration** — read review counts via Google Business Profile API (would need API key + admin consent).
6. **Brand asset library** — link out to SharePoint folder for materials/scripts/audits.
7. **Patient satisfaction widget** — quick survey scores per location, with month-over-month trend.

Bigger projects (1-2 days each)

8. **Social media calendar** — separate panel mirroring the visit calendar but for posts.
9. **Newsletter draft tracker** — manage draft content + approval flow.
10. **Campaign ROI calculator** — formal model: spending in × referral revenue out per campaign.

■ The honest read

For the **operational, daily/weekly/monthly workflow** of the Marketing Coordinator role — the app is well-suited.

For the **content, branding, patient-experience** sides of the role — the app intentionally doesn't try to be everything. The coordinator uses Outlook, Teams, design software, social platforms, and CRM tools to handle those.

This split is **on purpose**:

- A focused tool is better than a sprawling one
- Marketing teams already have tools for content / social — duplicating them creates work
- The app's strength is what it owns: visits, referrals, leads, and team coordination

If you want it to do MORE (the items in the "What we could add" list), that's a conversation for the next dev cycle.
