

Marketing Planner — User Guide

For team members · ICC of Texas

■ Marketing Planner — User Guide for Team Members

For: Duaa, Ms Sadia, Dr Ahsan, Ahmed (Manager), and any future team additions

Last updated: 2026-05-14

1. What is this app?

A web-based marketing planner that replaces the old paper-and-spreadsheet workflow. Use it to:

- ■ **Schedule visits** to clinics, MVA attorneys, and community outreach
- ■ **Track outcomes** — mark visits Completed / Postponed / Canceled
- ■ **Log spending** per visit, with caps + quarterly budgets
- ■ **Track leads** — which clinics have established relationships
- ■ **See rankings** of businesses by referrals

Everyone on the team sees the same data. Changes anyone makes show up on everyone else's screen within 5 seconds. No more "who has the latest version?"

2. How to open the app

On your laptop

Open any browser (Edge, Chrome, Safari) and go to:

https://anameen123.github.io/marketing-planner/marketing_schedule_FINAL4.html

(Bookmark it for quick access — Ctrl+D in most browsers)

On your iPhone

1. Open **Safari** (not Chrome — Safari only for the install step)
2. Paste the URL above into the address bar
3. After signing in once, tap the **Share button** (square with up-arrow at the bottom of Safari)
4. Scroll down → tap **"Add to Home Screen"**
5. Tap **Add**

You now have a one-tap app icon on your home screen. Opening it from there opens the app fullscreen — no browser, no URL bar.

3. Signing in

You'll see a sign-in screen with a white **"Sign in with Microsoft"** button.

1. Tap / click that button
2. A Microsoft sign-in window opens
3. Enter your work email (the one you use for Outlook) — @wcgtx.com for most of you, @frisco-er.com for Sadia
4. Enter your Microsoft password (same as Outlook)
5. Approve any 2-factor authentication prompt on your phone
6. You're in.

Trouble signing in?

- If you see *"This app needs admin approval"* — tell admin (Mahmoud); IT needs to grant permission for our tenant
- If you see *"You're not authorized to use this app"* — your email isn't in the access list; ask admin to add you

4. The 6 main tabs at the top

Tab	What you do here
■ Home	Today's snapshot + quick actions + team announcements

Tab	What you do here
■ Dashboard	The planning calendar — click any day to see/add visits
■ Status	Established leads CRM — see which clinics you've built relationships with
■ Team	Your profile + performance stats + history of your visits
■ Businesses	The bank of targets — clinics, MVA attorneys, outreach orgs
■ Finances	Spending log + rankings + tier settings

5. How to assign yourself a visit

1. Go to the **Dashboard** tab (calendar)
2. Click the day you want to schedule a visit on
3. A popup opens showing 6 visit slots for that day
4. In one of the empty rows:
 - Type the clinic / business name (or use **+ Add Visit** if it's a new one)
 - Click the **Assigned Member** dropdown → pick yourself
 - Click ✓ **Confirm** in your row
5. The visit is saved + shared with the team immediately

6. How to mark a visit completed

1. Open the day on the calendar (Dashboard tab)
2. Find your visit row
3. Change the **Status** dropdown to **Completed**
4. If you spent money: enter spending items in the spending column
5. Click **Confirm** to finalize

Note: You can only mark Completed **on or after the visit date** — never before.

7. How to log spending on a visit

1. Open the day → find your visit row
2. Click the **Spending** cell
3. Enter each item (e.g., "Cupcakes", quantity 3, price \$5)
4. Total is calculated automatically
5. Click **Save**

Spending must be saved within **3 days** of the visit (cutoff: 5 PM on visit_date + 3 days). After that, only admin can edit.

8. How to update lead status on a business

There are two ways:

Method A — From a visit

When you mark a visit Completed, a lead-status modal pops up. Pick:

- **Established** (with level L1-L4) — you built a relationship
- **Needs Work** — needs more visits
- **Dead End** — they're not interested

Method B — From a business card directly

1. Go to **Businesses** tab → Bank of Targets
2. Find the clinic / firm you visited
3. Click + **Set Lead** (or ↗ **Change** if already set)
4. Pick L1, L2, L3, or L4
5. Saves immediately, shared with the team

Level	Means
L1 — Front Desk	Relationship with receptionist / front desk staff
L2 — Coordinator	Office manager or coordinator level
L3 — Doctor	Direct relationship with the physician
L4 — Owner	Direct relationship with practice owner / decision-maker

9. The bell

Top-right corner. Click it to see:

- **If you're admin:** All admin override notifications (any changes you made to others' work)
- **If you're a member:** Notifications about YOUR work (when admin edits something of yours)

Members don't see other members' bells. Privacy by design.

10. The / sync badge

Small pill next to your name. Tells you the connection status:

Color	Meaning
 Live	Connected to SharePoint. Team-wide live sync working.
 Syncing...	Currently fetching changes. Wait a few seconds.
 Local	Working in offline mode. Your changes are saved locally but not shared with team yet.
 Sync error	Something failed. Click for details + Reconnect button.

Click the badge anytime to see diagnostic info.

11. Click a visit name → jump to the business card

In the calendar / Dashboard, the clinic name in the **Visit Info** column is clickable. Click it → the app jumps to that business card in the Bank of Targets, with a brief purple highlight.

Useful when you want to check the lead status, last visits, or notes about the business without losing your place in the calendar.

12. Roles — what each person can do

Role	Can do
Admin (Mahmoud)	Everything — edit anyone's data, change tier settings, override locks

Role	Can do
Member (Duaa, Sadia, Ahsan)	Edit your own visits + spending + leads. See everyone else's read-only.
Readonly Manager (Ahmed)	See everything. Edit nothing.

13. Editing rules — what locks you out

To prevent accidental data loss:

Action	Lockout
Edit a past visit	2 days after visit date — after that, admin only
Edit spending	5 PM on visit_date + 3 days
Mark as Completed	Cannot do it before the visit date
Reschedule to a past date	Never allowed

Admin bypasses the time-based locks but NOT the integrity rules ("Completed before date" and "past date" stay forbidden even for admin).

14. Common issues + fixes

Problem	Fix
"Can't sign in"	Check your @wcgtx.com email, confirm with admin you're in the access list
Sign-in popup blocked on iPhone Safari	Allow popups in Settings → Safari, OR tap the button twice
Sync badge red ■	Click it → click Reconnect
App looks weird on iPhone	Force-quit Safari, reopen via the Home Screen icon
Don't see a change someone made	Wait 5-10 seconds for sync, or refresh the page
Locked out of editing	Check the lockout rules above — admin can bypass

15. Getting help

- **Quick question / something broke:** Message Mahmoud directly (Teams or malthaaher@wcgtx.com)

- **Feature request / idea:** Tell Mahmoud, who logs it for the next update
 - **Found a bug:** Take a screenshot + describe what you did, send to Mahmoud
-

That's it. Welcome to the team's new marketing planner.
